## **IN THE SPECIFICATION**

Please amend the specification as follows:

Paragraph 0073:

Where, "fs" is a sampling frequency, "f in" is an input frequency, and "f out" is an output frequency. Also, " $\alpha$ " is a factor to determine whether it makes the output singing voice a male voice or a female voice. When WHen " $\alpha$ " is a positive value, the mapping function expressed by the equation (B) will be a convex function, and the output singing voice will be a male voice. Also, when " $\alpha$ " is a negative value, the output singing voice will be a feminine or childish voice			
		(refer to FIG. 7).
